ABOUT US

Janitized® vacuum bags and filters are the industry's first and most comprehensive line of commercial grade aftermarket filters designed for commercial cleaning professionals. Manufactured by APC Filtration Inc., an ISO 9001:2015 quality managed company providing over 25 years of air filter design, engineering, manufacturing and appliance testing to global equipment and appliance manufacturers. *Janitized*® vacuum bags and filters incorporate filter materials that meet or exceed OEM filter specifications and performance. These products are exceptionally tough and durable; built to handle demanding cleaning applications while improving indoor air quality (IAQ) and worker safety by capturing 99% of sub micron dust particles and allergens. *Janitized*® vacuum bags & filters meet and/or exceed OEM product specifications providing up to 40% more vacuum cleaner suction, up to 55% more dust loading area and up to 46% more wet/dry tear strength vs genuine OEM filter bags.
Legend:
- Windsor* Sensor*
- Windsor* Versamatic*
- ProTeam* Super Coach*

- Up to 99% micro-filtration at 0.3 micron**
- Up to 40% increased airflow
- Up to 55% increased filter area
- Up to 46% stronger than Genuine OEM bags

** Results of Fractional Efficiency Testing conducted by an independent laboratory @ 0.3 micron @ 26.5 fpm.

When you purchase Janitized® products you get premium quality filtration and peace of mind.

Janitized
Industrial & Commercial Sweeper / Scrubber Filters

Janitized® aftermarket panel & industrial filters offer TWO filter media options to cover most applications and operating conditions:
1. Cellulose filters for dry cleaning applications
2. Washable Spunbond filters for wet and dry applications

The Janitized ® filter frame construction is made up of a (4) piece rigid 24 gauge electro-galvanized steel frame, designed to prevent flexing and premature corrosion. Additional stiffeners are added to handle the sweeper's automatic vibration cleaning systems.

Janitized® panel filters provide increased filtration & longer filter life, reducing equipment downtime, filter waste disposal and maintenance costs.

RESTORATION FILTRATION

Natural disasters and man-made failures or defects cause damage to buildings and its contents disrupting people's lives, businesses and the communities they are in. The disaster restoration industry uses a variety of specialized equipment to remedy the damage caused by water, fire and mold growth. The equipment is only as good as the filters used.
